The adaptability of the electric light, apparant that it is a matter of surprise that a man of medicine was not the discoverer of its valuable properties. The instrument when used upon the human body may be inserted in various ways. It contains at one end an objective which forms an image of thepart examined. It permits of the iland the consequent examination of thesame by the aid of lenses. The light is very clear, said to be in no way inforious and shows the parts in their proper cotors.

"There is no lead pencil," boldly explains a writer in the Scientific American, "and there has been none for fiftyyears past." The name of lead pencil: came from the old notion that the products of the Cumberland mines, England, were lead, instead of being plumbago or graphite, a carbonate of iron, capable of leaving a lead-colored mark.

Brides, as a rule, find it a new and rather unpleasant sensation to accept money from their husbands immediately after marriage. But an allwise Providence provides for such matters, and in the course of time this feel-

The people of the east who are wrestling with the frigid blasts of winter arato be pitied by the residents of New Mexico who are enjoying the present balmy days.

On the outside of this issue of the RANGE mention is made of the Socorro Evening Advertiser which is not complimentary. Since the item was printed the Advertiser has improved so greatly in all respects that a substitute is necessary in justice. If the Adsame ratio it will be second to none in the territory soon.

Important Court Decision.

Justice Field of the United States Supreme court in the case of St. Louis Smelting Co. vs. Kemp and Nuttall coming before him from the state of Colorado, has rendered the following decision which will be of interest to mining men as changing the present interpretation of the law concerning the work necessary and manner of obtaining patent for more than one lo-

"If a miner has only the ground covered by one location, "his mining claim" and "location" are identical, and the two designations may be indiscriminately used to denote the same thing. But if by purchase he acqures the adjoining location of his neighbor-that is, the ground which his neighbor has taken up-and adds it to his own, then his mining claim covers the ground embraced both locations, and henceforth he will speak of it as his claim adjoining locations as he can purchase, and the ground covered by all will constitute what he claims for mining purposes, or, in other words, will const tute his mining claim, and he so designated. Such is the general understanding of miners and the meaning they attach to the term.

Section five of the Act of 1872, rer. dering a mining claim subject to re-location where certain conditions of improvement or expenditure have not nal locators, "their heirs, assigns, or legal represesentatives, have not resumed work upon the claim after such failure and before such location." These provisions are of themselves conclusive that the locator's interest in a mining grant is saleable and transferrable, even were there any doubt on the subject, in the absence of express statutory prohibition. Those of the Act of 1870 are also conclusive of the right of the purchaser of claims to a patent, for it is with reference to it that the derivative right by purchase or assignment is mentioned. Revised statutes, Sections 2332 and 2334.

By a provision of the mining Act 1870, still in force, two or more persons er association of persons, having contiguous claims of any size, are allowed to make a joint entry thereof. Revised statutes, section 2330. If one individual, should acquire all such contiguous claims by purchase, no sound reason can be suggested why he should not be equally entitled to enter them all NEW by one entry as when they were held by the original parties. To quote the language of the case cited: "No motive can be imagined for allowing two or more persons to unite their entries in one survey which does not apply with at least as much force for allowing a single person to unite his entries adjoining each other, in one survery.' There is no force in the suggestion

that a separate patent for each locaexpenditure of labor upon it. The statute of 1872 provides that on each claim subsequently located, until a patent is issued for it, there shall be annually expended in labor or improvements \$100; and on claims previously located, an annual expenditure of \$10 for each one hundred feet in length along the vein; but where such claims are held "in common," the expenditure may be upon any one claim." As these provisions relate to expenditures before a patent is issued, proof of them will be a matter of con- Note Heads, Letter Heads, Bill Heads, sideration when application for patent is made. It is not perceived in what way this proof can be changed or the requirement affected, whether the paplication be for a patent for one claim or for several claims held in common. Labor and improvements, within the meaning of the statute, are deemed to have been had on a mining claim, whether it consists of one location or several, when the labor is performed or the improvements are made for its development; that is, to facilitate the extraction of the metals it may contain, though in fact such labor and improvements may be on ground which originally constituted only one of the locations, as in sinking a shaft, or be at a distance from the claim itself, as whether the labor is performed for the turning of a stream, or the introduction of water, or where the improve-ment consists in the construction of a flume to carry off the debris or waste material. It would be absurd to require a shaft to be sunk on each loca-tion in a consolidated claim when one shaft would suffice for all the locations; and yet it is seriously argued by counsel and must be maintained to uphold the judgment below. Judgment of the court below re-

THE BLACK RANGE.

Friday, November 23, 1883. SUBSCRIPTION: Six months

I have a stock range with six miles of running water and unlimited range for sale at a bargain. There is nothing finer in New Mexico. Correspondence solicited. V. B. BECKETT. Chloride, N. Mex.

FAIRVIEW.

Jacob Blun is a juryman at the court

Jim Moreland has his ox teams log- it freely. ing at the saw mill.

Mrs. Kingsbury of Grafton paid Fairview a flying visit this week.

There is a rumor current that the Black Knife is likely to start work

again in the near future. The herd of cattle quartered at An-

the pasture in the immediate vicinity. Quite a number of ranchmen in the Cuchillo valley are making out papers for their ground lying north of Robin-

pearance of late, only three families remaining in the phantom metropolis of the range.

Major Day is at Socorro in attendance on the grand jury, while J. A. Anderson is paying the city a visit on

his return to the range depends on the growth of the country.

Capt. Sansom has been increasing his tition to shut off his fire-side customers from the general business portion of the store.

W. E. Taylor and J. Q. Wills have been spending a day or two around game bag lays over anything heard of bonanza king.

Anderson's ranch at the mouth of Dry creek, is ornamented by a Halli- blacksmithing. day's wind-mill and pump, which has the idea that position is everything, second on number two. sans in tumbling and therefore by the lor will help him on this. laws of specific gravity his head must be the heaviest and best part for it struck water first and impelled by the amount of body behind sunk deep into the aqueous solution, finally stopping when good resting ground was reached and an opportunity to turn round was effected. John climbed out a little slower than the last half of his descent and after arraying himself in Mr. Anderson's cast-off clothing, some gunny sacks and a shawl started for Chloride to find out if the Chinaman had sent his last washee home. Beyond a vicious cut from the saw which got mixed up with his hand and a bruise on his shoulder no injuries were sustained, but he objects to so cold a unexpected visits.

Fairview has been having a series of disgraceful occurrences of late which are enough to dishearten peaceful citizens whose pride is the general good behavior of their city. Hoodlumism and lawlessness are poor recommends to people looking out a location for a home, and many a desirable place has been passed by on account of undesirable citizens. A social scandal that has long been an eyesore to the better portion of the community, culminated lately in an attempt to shoot and other outrageous demonstrations. This was followed shortly by a specie of hoodlumism, which while not so criminal, shows a spirit that only originates with the low down class that are void of self respect for themselves and care for to freighters as well as to miners. the rights of others. The mode of prothey considered themselves slighted and thereon. keeping the whole neighborhood in confusion and fear. A stabbing affray slight wound at the hands of a miner, deer as the result of their expedition. and giving a black eye in return. The above and sundry minor occurrences culminating last Monday evening by a pugilistic encounter in which Kean St. Charles and Billy Ensley figured as principles. Billy being drunk and having more tongue than activity, comtroubles, when Kean returned it giving suited to building purposes.

body seems satisfied with the result.

GRAFTON.

Gus Cate and Geo. Smith are doing assessment work on the Great Southwest for the Kingsbury Bros.

The boys from the Ivanhoe ranches went down to the land office at Las Cruces the first of the week to make their final proofs.

Three eight hour shifts are driving the Alaska drift at the rate of two feet per day. The rock is softer than it was but it is harder than dirt yet.

Business is reported to be excellent at Grafton this season. The miners are all at work and consequently have Kingston saw mill and he contemplates coming upon him at this time makes money. And having money they spend

The new pump for the Royal Arch mine was shipped from Denver on the 14th inst and it will probably be in place issue of the RANGE.

quite a pile of ore much of which shows considerably better than the shows considerably better than the drifts will be able to do much toward contributing to the success of the Chloral Sample tested as mentioned last week. This ore outblow is all that prospectors have as yet been able to find upon the surface however, but as evidently in the mineral lies in the form of a deposit the body lying underneath may be struck by sinking any place near him on the hill. Everybody who has avisited teoncurs in believing that Sam has a good thing there anyhow.

The Black Knife Mining company think of hauling their ore from the Cuchillo's to the concentrator and having it worked. Edwards' camp proposes to put in a few tons daily—good, These mining districts had not been to the mine would bring if there were any left the mine would bring if there were any for the mill. We believe that there is not believe that there is not of contractors.

He was in the 22nd year of his age—only a boy, but he had no superior as a miner. A quiet, unassuming young man, having none of the vices so common to rovers, with a habit of attending to no one's business but his own; generous and always courteous he won the friendship and esteem of everyone with whom he came in contact, and the mourning at his untimely decease was visited teconcurs in believing that Sam has a good thing there anyhow.

The Black Knife Mining company think of hauling their ore from the Cuchillo's to the concentrator and having it worked. Edwards' camp process to put in a few tons daily—good, These mining districts had not been taken into account as furnishing ore for the mill. We believe that there is in holding it idly for buyers at the comparatively small figures which the mines is the protection and having the content of the water, will be driven more to rovers, with a habit of attending to no one's business but his own; the result habit to rovers, with a habit of attending to no one's business but his own; the most own one's business but his own; the whole his interest

point the wounded man had been re- bids. moved, and he will remain with him until he gets well or dies. The Albuquerque papers speak of the accident as follows. The Democrat of Tuesday says: "A miner who had been working for W. H. Patten in the coal mines at Gallup, met with a serious accident. He was on his knees at the bottom of the mine, and by the falling of a large lump of coal from the top which struck him on the back, so seriously injured him that he will hardly recover. A reporter interviewed Dr. C. C. Baker of the injuries received and he informs us that it will be a miracle if he recovers. His spinal column is so injured, that his lower extremities are paralyzed, but the extent of the internal injuries cannot be definitely understood." The lime kiln is burning under the And the Journal of Wednesday: "J. S. leg and was otherwise injured by the is under the charge of Dr. C. C. Baker."
