INTRODUCTION

Publications in New Mexico entomology reflect an interesting history. For example, economic value of a crop or a segment of agriculture is no indicator of the number of related entomology publications produced by the University. In one instance, at least, aesthetic values overshadow economic values. Apples, plus a few miscellaneous fruits, have contributed comparatively little monetarily to the economy of New Mexico but have been written about, entomologically, more than all major cash crops (alfalfa, corn, small grains, cotton, all livestock, range land) combined. A few cash crops (broom corn, peanuts, sweet potatoes) that are of importance in limited geographical areas in New Mexico have never been the subject of an insect publication.

An attempt is made herewith to list all publications of present and former entomologists of this University during their tenure in New Mexico and their later ones that resulted from research in New Mexico. In addition, entomologically oriented publications by the faculty in related disciplines are included. This bibliography serves to highlight those subject-matter areas where insects have been of greatest interest and concern, when they were important, what crops were involved, as well as what crops and insects have been neglected.

Changes in publication custom and policy have been brought into focus by the fact that the first two entomologists, C. H. T. Townsend and T. D. A. Cockerell, particularly the latter, published 85 percent of all titles listed herein in a period of about 10 years. All subsequent faculty, including those from related disciplines writing on entomologically oriented subjects, contributed the remainder.

Each citation listed here was examined in the original where possible, and this includes a large percentage of the entomological titles. The non-entomological titles by T. D. A. Cockerell were taken from Weber's 1965 (see below) treatment of that author. A title listed without notation was seen in the original or was found listed in two or more bibliographical sources. Otherwise, after the entry, the single source carrying the title is shown by a symbol as follows:

(CSP) - Catalogue of Scientific Papers (1864 - 1900), Vol. 13-19. Published by Royal Society of London 1914 - 1925.

(ICSL) - International Catalogue of Scientific Literature. Part N. Zoology. Covers the period 1901 - 1912. Prepared by an international committee and printed by Mini-Print Corporation, Metuchen, New Jersey.

(ILE) - Index Literaturae Entomologicae (1868 - 1900). Walter Dörfler and Ursula Schending. Deutsche Akademie der Landwirtschaftswissenschaften, Berlin, 1962.

(WAW) - Theodore Dru Alison Cockerell, 1866 - 1948. William A. Weber, University of Colorado Press, 1947.

In addition to the above sources and the current standard indexing periodicals, a number of the older journals and periodicals, including obscure and discontinued ones, were searched individually in compiling this bibliography. Weber's bibliography of Cockerell was by far the most complete of any source for an earlier author, but a number of his titles and numerous ones by other early authors were found only through detailed search of individual early, obscure journals.

Entomology led the long parade of technical publications from the Agricultural Experiment Station at New Mexico State University. Bulletin 1 (1890) was devoted entirely to announcements. Bulletin 2 (1890) was entitled "Announcements," but included some notes on "Toxicous insects and plants", the first such reference in an official publication of the institution. Bulletin 3 (1891), the first subject-matter bulletin, was titled "A preliminary account of some insects injurious to fruits". Perhaps the first entomology publication by a New Mexico-based entomologist was "An insect pest which should be destroyed at once", a news item on a bagworm, by Mr. Townsend. This appeared in the Rio Grande Republican on Friday, March 27, 1891, a few days after he arrived for duty at the recently established New Mexico Agricultural College.

Although Townsend was employed a little more than two years by the New Mexico Agricultural College, Las Cruces

was more or less his base of operations for a span of six or seven years. During that time, by present-day standards, he compiled an extensive bibliography of nearly 200 titles.

Townsend's output, however, was dwarfed by the voluminous one of Cockerell, who produced nearly 1100 titles during the 10 years he resided in New Mexico, mostly at this institution. His extensive bibliography is accounted for in part by his numerous short "notes". These range in length from one of a single line to many of two to 10 lines. During one 18-month period, February 1897 to April 1898, he published 155 titles, 60 of which were of one page or less. Many of these would not find acceptance in contemporary scientific journals, but Cockerell was of a different era, in which his style and manner of publication was apparently appropriate and accepted. Concerning Cockerell's publications, Weber (1965) writes: "The key to Cockerell's productivity was, I believe, the fact that he believed in publication as a means of communication rather than as a means of promulgation, and that he was obsessed with the drive to communicate to others the thoughts of his lively intellect, the facts he had learned, and to carry on dialogues on the great issues confronting the world".

Mr. Cockerell was indeed a most remarkable man. He received only limited formal education during his sickly youth and young adult life. He held no academic degrees yet his writings were impeccable and he spent 41 years of his professional career at three state institutions of higher learning - New Mexico College of Agriculture and Mechanic Arts (Las Cruces), New Mexican Normal University (Highlands) and University of Colorado (Boulder). His many non-entomological publications, some of which are listed herein, attest to his vast energy and great diversity of interests. In addition to many areas of entomology, he published in a broad array of subjects in zoology, botany, education, health, sociology, and religion.

The references cited here include books, scientific journals, farm journals, and newspapers in addition to the official publication series of each of three institutional divisions listed below:

AGRICULTURAL EXPERIMENT STATION

a) *Annual Report*: The first one covered the period 1889-1890 and one was published annually through 1974.

b) *Bulletin* 1 was published in 1890 and consisted of general announcements. Others published through the years have brought the number presently to almost 700.

c) *New Mexico Entomologist*: Only two numbers of this were published, both in 1894. In a letter to the Board of Regents dated April 25, 1894, Professor Cockerell requested "... facilities for publishing frequent numbers of the little sheet which I have designated *The New Mexico Entomologist*." This request was made after the first issue had been published on April 21. The second was published on May 21, and both carried the notation, "Published at irregular intervals by the Entomology Department of the New Mexico Agricultural Experiment Station." A letter from President S. P. McBurn, dated July 21, 1894, to Professor Cockerell, who was on a trip in Santa Fe, implied at least temporary approval by his statement - "If you publish any copies of the N.M. Entomologist while in Santa Fe, please have the work done at the New Mexican". Of the Minutes of the Board of Regents that have been seen (all are not available) none reported action on the April 25 letter. It seems a reasonable assumption, however, that either the Regents or the President, who was also Director of the Experiment Station, vetoed the idea of continuing this publication.

COOPERATIVE EXTENSION SERVICE

a) *College Courier* started in 1912, several years before the beginning of the Cooperative Extension Service, and continued until 1916. Its purpose was to provide an organ of publication for the newly established "Extension Department," to make the expertise of the college faculty more available to the people of the state.

b) *New Mexico Farm Courier* commenced publication in 1916 with only a name change from its predecessor, the *College Courier*. It continued publication until 1921.

c) *Circular*. The first circular was published in 1915, and they have continued to date. The last one in 1978 carried the number 484.

d) *New Mexico Extension News* commenced publication in May, 1921, only four months after the *New Mexico Farm Courier* was discontinued, and it continued until the fall of 1974.

e) *The 400 Series* came into use ca 1945, the exact date was not ascertained. It was initially employed by the Extension specialists for temporary identification of mimeographed, rapidly changing recommendations, with no thought of their being preserved as historical documents. For example, recommendations for "Apple Insect Control" may have been assigned the number 400 1-1 and several hundred mimeographed copies produced. These were handed out at farmer meetings and mailed out in answer to specific questions until the supply was exhausted. They were seldom revised or reprinted under the same number, but at some appropriate time updated material would be reissued under a different number and the same or usually a slightly different title. Instead of a number being retired when it was out of print, it would be used at some later date for an entirely different subject. No master list was maintained of the subjects published under the various numbers, so there is no way to be certain that we found them all.

f) *Miscellaneous*. Two other informal series were employed to disseminate timely entomological information that were preserved neither by file copy or master list and are not included in this bibliography. The "Insect News Letter", an unnumbered series, was mailed to county agents and commercial and technical workers and was often printed in various of the county newspapers. At least 42 of these were issued

between 1970 and 1976. The "Pesticide Chemical News", numbered serially by year, was directed to the same audience as the "Insect News Letter" and carried news of changes in federal regulations relative to pesticide use. At least 115 of these were issued between 1970 and 1976.

ACADEMIC DEPARTMENT

a) The *College Catalog*, issued annually since the first one which covered the academic year 1889-90, carries an assessment of the departmental programs, including entomology, and their needs as well as a description of the courses offered.

b) *New Mexico Collegian* claimed to have been the first college newspaper in New Mexico and was published by the Columbian Literary Society from 1893 to 1907. It usually carried one contributed article of a semi-technical nature and often involved student participation. The entomology articles are included in this bibliography.

c) *College Weekly* was published during one academic year, 1906-07, by the Stenographer's Association of New Mexico, which consisted essentially of the students and alumni of the Stenography Department.

d) *Round-Up* became the official student newspaper in 1907, at which time the "New Mexico Collegian" and the "College Weekly" ceased publication. The "College Weekly" and the "Round-Up" carried news items, but no contributed articles, of activities and programs of the different departments and are thus not cited in this bibliography.

e) *Annual Report to the President of the University* is a formal, in-house report that began with the 1959-60 fiscal year and presents a concise appraisal of departmental accomplishments, progress, limitations and needs as seen by the department head. This publication is not referenced in the bibliography, but it is mentioned here because it provides

a brief sketch of teaching, research, and extension entomology at this University not found elsewhere. Bound copies are in the University library.

This bibliography is organized into eleven major subject-matter groupings, with subdivisions under which titles are listed chronologically, by year. The various categories and subcategories that are utilized should be regarded as rough classification, because many of the articles cover more than one aspect of the subject. They are classified according to the principal subject or emphasis, and no attempt was made to cross-index.

Under the category of "Systematics and Taxonomy", a large percentage of the titles were published by Townsend and Cockerell between 1891 and 1906, predominantly in the order of insects, a diversity of taxonomic inquiry by an individual unheard of today. In addition, Cockerell published extensively on Mollusca (snails).

The earlier titles listed under "Biology, Ecology, and Behavior" contain considerable taxonomy and systematics, because these areas were intertwined with the taxonomic interests of the authors. In recent years, such areas of investigation have been more host and commodity oriented and thus present less difficulty in rational classification.

A little more than one-third of all titles relate to "Economic Entomology" and a large majority of these are Extension or "how-to-do-it" in nature. About 18 percent of the titles are non-entomological, of which nine percent is non-entomological Zoology, three percent Botany, and six percent non-biological. The non-entomological titles were written mostly by Cockerell.

BIBLIOGRAPHY OF ENTOMOLOGICAL SUBJECTS
AND OF OTHER SUBJECTS WRITTEN BY
PRESENT AND FORMER ENTOMOLOGISTS AT
NEW MEXICO STATE UNIVERSITY, 1891 TO 1970

SYSTEMATICS AND TAXONOMY

Collection

1. 1931. Identification of the genus of *Chrysomelids* *Chrysomelids*.
C. W. C. Townsend. (unpublished). 10-100-101.
2. 1935. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
First Supplement. 1-11. Descriptions of eggs and larvae.
3. 1938. A new species of *Chrysomelids* in *Chrysomelids*.
T. E. A. Townsend. *Chrysomelids*.
4. 1938. The genus *Chrysomelids*. T. E. A. Townsend. *Chrysomelids*.
5. 1942. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
(Supplement No. 1). T. E. A. Townsend. *Chrysomelids*.
6. 1943. The *Chrysomelids* genus *Chrysomelids*. T. E. A. Townsend.
Chrysomelids 10-11.
7. 1943. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11.
8. 1943. The new *Chrysomelids*. T. E. A. Townsend. *Chrysomelids*.
9. 1945. A new species of the *Chrysomelids* of the
genus *Chrysomelids*. *Chrysomelids*. T. E. Townsend.
New 10-11. No. 10. 1-10.
10. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
11. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
12. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
13. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
14. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
15. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
16. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
17. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
18. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
19. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
20. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
21. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
22. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.
23. 1945. *Chrysomelids* (Chrysomelidae) (Insects of the U. S. A. Townsend).
New 10-11. No. 10. 1-10.

Diptera

12. 1951. Notes on North American Ichneumonidae, part, 100, with descriptions of new species. Paper 2. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 139-146.
13. 1951. Notes on North American Ichneumonidae, part, 101, with descriptions of new genera and species. Paper 3. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 147-155.
14. 1951. Descriptions of a new subgenus and new species, with notes on the generic groups. C. W. T. Townsend. Canadian Entomol. 78: 223-225.
15. 1951. A new ichneumonid from a Chironella. C. W. T. Townsend. Canadian Entomol. 78: 226-227.
16. 1951. A new ichneumonid from Vancouver. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 156-157.
17. 1951. On the generic position of some species. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 158-159.
18. 1951. A new ichneumonid from Vancouver. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 160-161.
19. 1951. The North American genera of Ichneumonidae. 1. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 162-163.
20. 1951. The new ichneumonids. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 164-165.
21. 1951. A new Ichneumonid from western New Mexico. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 166-167.
22. 1951. Notes on the new ichneumonids. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 168-169.
23. 1951. A new ichneumonid from the new ichneumonids. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 170-171.
24. 1951. Notes on North American Ichneumonidae, part 102, with descriptions of new genera and species. 127. Trans. Am. Entom. Soc., Wash., 73: 172-173.
25. 1951. The North American genera of Ichneumonidae. 2. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 174-175.
26. 1951. The North American genera of Ichneumonidae. 3. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 176-177.
27. 1951. The North American genera of Ichneumonidae. 4. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 178-179.
28. 1951. The North American genera of Ichneumonidae. 5. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 180-181.
29. 1951. Notes on North American Ichneumonidae, with descriptions of new species. 128. C. W. T. Townsend. Trans. Am. Entom. Soc., Wash., 73: 182-183.

40. 1882. The North American genus of *Leptocryptus* Macleay. T. A. T. Townsend. *Ann. Entomol. Soc. Amer.* 14: 196-198.
41. 1882. Notes on North American Tortricidae, with descriptions of new genera and species. Paper 2. T. A. T. Townsend. *Canadian Entomol.* 21: 161-170, 17-82.
42. 1883. A monographic review of *Elidias* species. T. A. T. Townsend. *Canadian Entomol.* 22: 129-131.
43. 1883. Notes on North American Tortricidae, with descriptions of new genera and species. Paper 11. T. A. T. Townsend. *Canadian Entomol.* 22: 100-112.
44. 1885. A preliminary grouping of the described species of Tortricidae of North America, with one new species. T. A. T. Townsend. *Canadian Entomol.* 24: 121-126.
45. 1871. (Revised). Contributions to a monograph of the *Geometridae* subtribe *Elidinae*. T. A. T. Townsend. *Transac.* 1: 1-16.
46. 1891. New North American Tortricidae. T. A. T. Townsend. *Transac.* 1: 80-91.
47. 1893. New North American Tortricidae. T. A. T. Townsend. *Transac.* 1: 117-121.
48. 1895. New American Tortricidae. T. A. T. Townsend. *Transac.* 1: 149-157.
49. 1892. New contribution to the systematic treatment of Tortricidae. T. A. T. Townsend. *Transac.* 1: 166-187.
50. 1893. Notes on *Elidias* species. Paper 1. T. A. T. Townsend. *Transac.* 1: 117-126.
51. 1895. The new-found forest fly. T. A. T. Townsend. *Transac.* 1: 171-178.
52. 1893. Introduction of the described North American species of Tortricidae of the subtribe *Elidinae*. T. A. T. Townsend. *N.Y. Acad. Sci.* 1: 144.
53. 1895. Description of a new species of Tortricidae from Idaho. T. A. T. Townsend. *Transac.* 1: 129-131.
54. 1891. A new "genus" of Tortricidae. T. A. T. Townsend. *Transac.* 1: 87.
55. 1891. Tortricid genera of American material. Part 1, with index. T. A. T. Townsend. *Transac.* 1: 119-129.
56. 1891. An *Elidias* from New Hampshire. T. A. T. Townsend. *Transac.* 1: 124-125.
57. 1895. Descriptions of North American Tortricidae from the year 1891 and 1892-1893. T. A. T. Townsend. *Transac.* 1: 246-248.
58. 1895. Tortricidae of America and new European's contributions to their knowledge for *Elidias* subtribe. T. A. T. Townsend. *Transac.* 1: 114-115.
59. 1895. Introduction to America and new European's contributions to their knowledge for *Elidias* subtribe. T. A. T. Townsend. *Transac.* 1: 119-121.

12. 1886. The systematic position of *Diaprya*. J. N. S. Townsend. *Botany* 15:133.
13. 1887. On a new species of *Leptochloa* from Mexico. C. D. C. Townsend. *Ann. and Mag. Nat. Hist.* 11:119-120.
14. 1888. Two species for consideration new species *Leptochloa*. C. D. C. Townsend. *Canadian Journal* 1: 1-7-8.
15. 1888. A new species from Yucatan, in *Diaprya*. C. D. C. Townsend. *Canadian Journal* 1: 1-7-8.
16. 1889. Further on the species considered as the highest. *Annals*. C. D. C. Townsend. *Canadian Journal* 1: 1-7-8.
17. 1889. Comments on the new species of *Diaprya* from Mexico, *Diaprya*, *Leptochloa*, and *Diaprya*. C. D. C. Townsend. *Canadian Journal* 1: 1-7-8.
18. 1889. Second consideration of the new species *Diaprya*. C. D. C. Townsend. *Botany* 18: 1-12.
19. 1889. *Diaprya*, part III of *Diaprya* and *Leptochloa*'s morphology of the *Diaprya* *Diaprya*. C. D. C. Townsend. *Botany* 18: 1-12.
20. 1891. A new species from a new species *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
21. 1891. A new species from Yucatan of a new species *Diaprya*. C. D. C. Townsend. *Ann. Mag. Nat. Hist.* 11: 1-12.
22. 1891. Description of a new and interesting species of *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
23. 1891. Description of the new species *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
24. 1891. New species *Diaprya* *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
25. 1891. New species *Diaprya* *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
26. 1891. A new species from *Diaprya* *Diaprya*, with a new species *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
27. 1891. A new species and new species *Diaprya*, with a new species *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
28. 1891. New species *Diaprya* *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
29. 1891. New species *Diaprya* *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.
30. 1891. Description of the new species of *Diaprya*. C. D. C. Townsend. *Botany* 20: 1-12.

69. 1986. Contributions to the ichthyology of North America. 71. Sacramento, Oregon, California, etc., L. C. F. Townsend. Amer. Zool. Soc., Trans. 21:29-40.
70. 1888. *Amphipoda californica*. T. S. A. Packard. Mem. Zool. 26:144-163.
71. 1892. On the fishes of Baja California, including some washed from opposite regions. L. C. F. Townsend. Bull. Acad. Sci., Paris, 4:415-416.
